Summary

Junior Flutter Developer with hands-on experience building real-time mobile and web applications using Flutter and Firebase. Skilled in Clean Architecture, Provider, GetX, REST API integration, geolocation services, and real-time database systems. Seeking a Junior Flutter Developer position in a growth-oriented company.

Technical Skills

- Flutter & Dart
- State Management: Provider, GetX
- Firebase: Authentication, Cloud Firestore, Realtime Database
- REST APIs Integration
- Google Maps API & Geolocation
- Clean Architecture
- Git & GitHub
- ASP.NET MVC & Core
- Oracle SQL & PL/SQL
- HTML, CSS, JavaScript

Projects

- **E-Commerce Mobile Application (Flutter):** Built full e-commerce app, integrated REST APIs, used Provider, applied Clean Architecture, migrated from Firestore to Realtime Database.
- **HR Management System – Mobile App:** Real-time attendance tracking, role-based access, geofencing validation, Google Maps API integration, GetX state management, Firebase Authentication & Realtime Database.
- **HR Management System – Web (Flutter Web):** Web dashboard for real-time monitoring, live employee tracking, integrated with Firebase backend.

Experience

- **Flutter Developer Trainee – Menaitech (Amman)** | Nov 2025 – Feb 2026: Completed 3-month intensive Flutter training program. Built production-ready applications using Flutter & Firebase, applied Clean Architecture principles, implemented real-time systems and

geolocation features. Awarded an official training certificate. Completed additional training in Effective Communication & Life Skills.

- **Intern – FACT** | Jul 2024 – Sep 2024: Developed ASP.NET MVC & Core applications, built RESTful APIs, worked with Oracle SQL & PL/SQL.
